

TruckView®

The lens that eliminates the HGV passenger-side Blind-Spot

Cyclist situated in the Blind-Spot

REDUCE BLIND-SPOT AND SIDE-SWIPE ACCIDENTS

TruckView Helps Detect Other Road Users When HGV Drivers:-

- Turn left, - Right Hand Trucks
- Turn right, - Left Hand Trucks
- Make Roundabout lane changes
- Manoeuvre in 'Tight spots'
- Make Motorway Lane changes

What's a TruckView Fresnel lens?

Although TruckView is a visual device for drivers, it is not a mirror. It is a clear, thin, flat plastic lens that is press fitted to a truck's passenger door window glass. Its concentric ring surface allows the driver to see through it directly, (so it's not a reflected view) however its optical properties provide a downwards view close to and around the truck's passenger door. TruckView therefore covers this mirror blind-spot which is the cause of so many accidents.

"Thank you for the lenses, they are all fitted and the drivers feedback is very positive. I believe we are the only fuel distributors that use these at the moment, if you are able to put us on your web site as a user that would be very much appreciated."
